

Nicholas Thomson

I am a Professional Software Engineer with over 10 years of experience. I have worked on a wide variety of projects and technologies, including Javascript/Typescript, ReactJS, AngularJS, and Ruby on Rails. I have a passion for learning new things, and I am a strong believer in the importance of clean code. I strive to write code that is easy to read and understand. I am a team player, and I enjoy working with others to solve problems and build great software.

Professional Experience:

Firstup

Software Engineering Lead

October 2022 - Present

- Managed communications with internal stakeholders to ensure visibility into team delivery
- Lead a team of developers through delivery of several projects and feature releases
- Maintained a focus on customer and security issues, keeping critical issues to a minimum and reducing customer defects

Microsoft

Software Engineer II

June 2021 - October 2022

- Developed and optimized web applications for the Sharepoint team using TypeScript and ReactJS.
- Contributed to the design and architecture of scalable front-end systems.
- Worked closely with cross-functional teams to deliver high-quality software products.

Firstup

Senior Software Engineer

July 2018 - June 2021

- Responsible for developing and maintaining a React app served to over 1,000,000 monthly active users
- Lead initiatives to develop and implement new features in a modern React app

Aledade

Senior Software Developer

February 2017 - July 2018

- Responsible for a large project written in Flask and AngularJS.
- Created charts and visualizations using the D3.js library.
- Lead various projects to completion and implementation in a large-scale web application for real world use cases.

NeoReach

Frontend Developer

March 2016 - February 2017

- Responsible for overseeing and executing a large portion of a total interface overhaul.
- Implemented coding standards across multiple projects and repositories using primarily Angular 1.5
- Architected major software changes in the client-side code to better fall inline with best practices.

Cloudspace

Software Engineer

November 2012 - February 2016

- Designed and Implemented coding standards, processes, and documentation for the overall Engineering Team.
- Handled Engineering-facing client relationships by estimating work, attending sales meetings, and communicating client specifications to other members of my dev team.
- Implemented web UIs in various frameworks on top of internally built RESTful APIs.
